

World's First **GNH** Guided Project Management Platform

jaggle.ai

Project Management
is a **\$100B+** industry
with a problem

Many Organization
ignore the well being
of the people doing
the work

“ 77% of the employee are asked to take on the work beyond their capacity at least weekly adding to pressure

Forbes

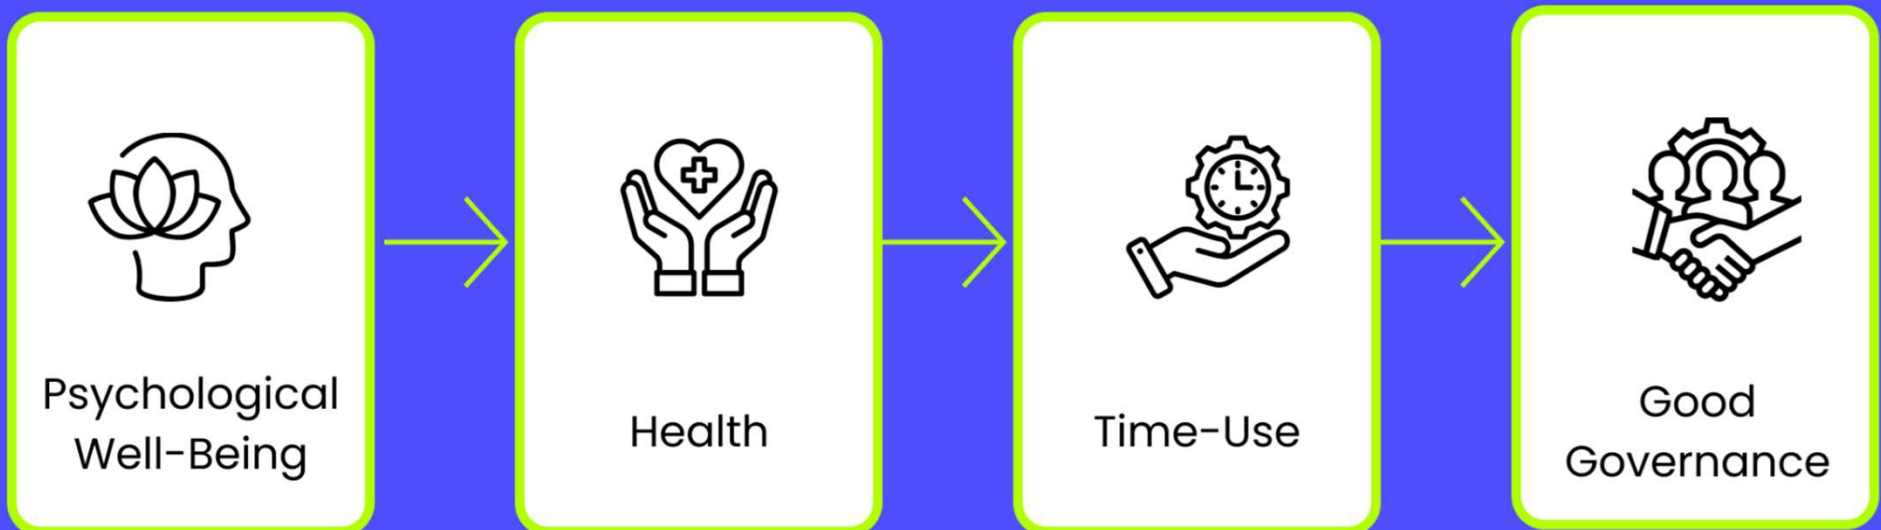

“ 82% of the employee are at the risk of burnout, but only half of employers design work with well-being in mind

FORTUNE

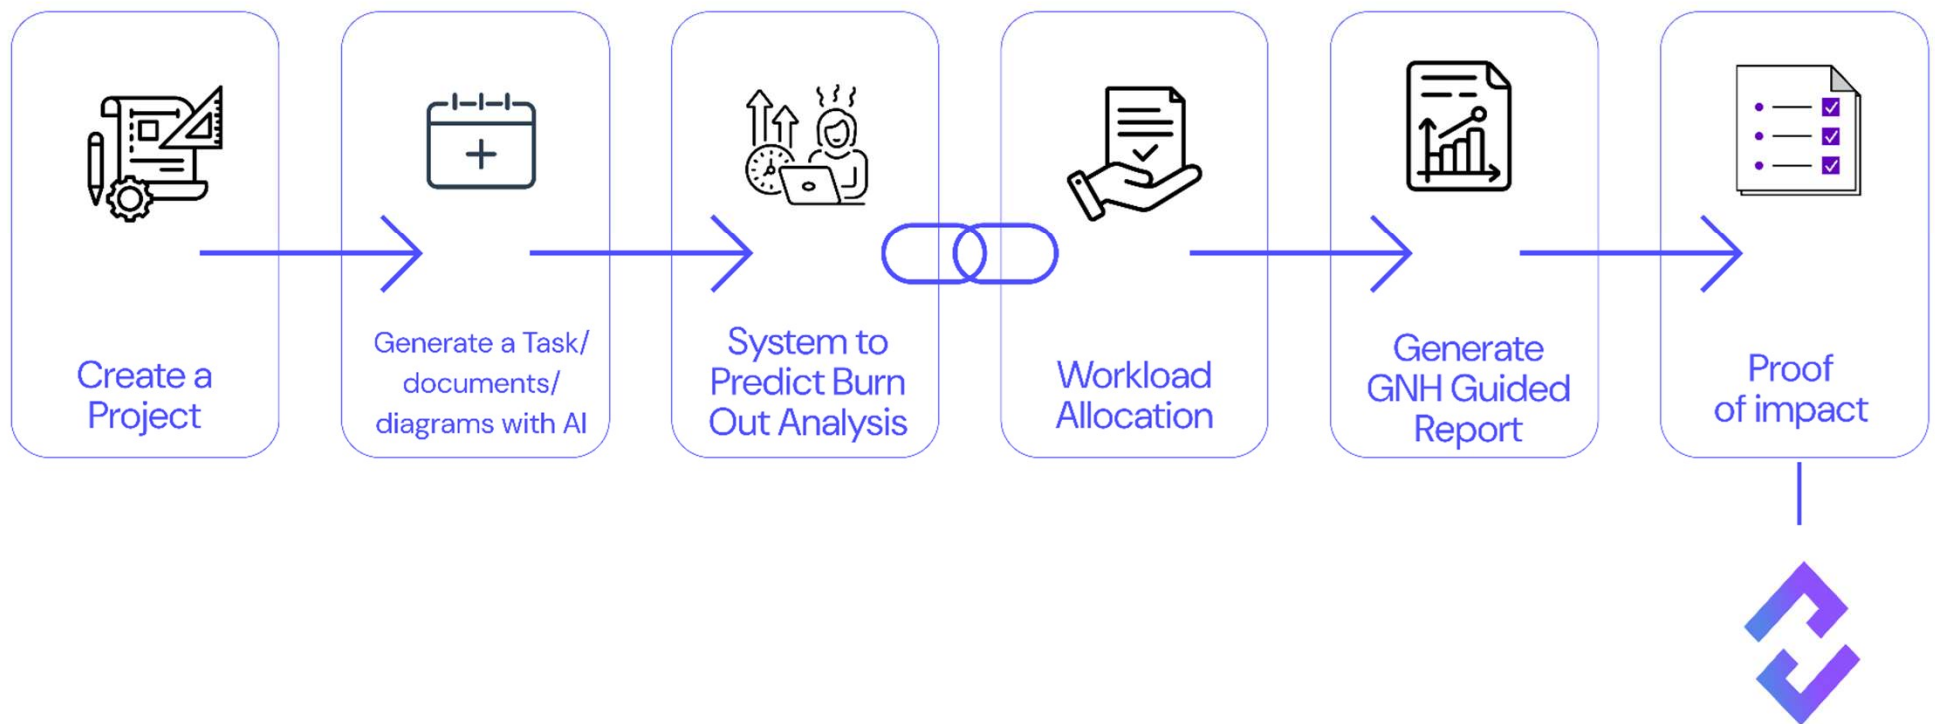

“ Company loses 20–30% of their revenue due to inefficient working processes

We're building **better** project management guided by the philosophy of Gross National Happiness (GNH)

What used to burn teams out, now balances well being and efficiency

Project Management, Reinvented!

It's more than just Project Management Tool

GNH Reporting

- This report gives leaders a clear view of their organization's well-being and performance through the lens of Gross National Happiness (GNH) values. It highlights burnout trends, engagement levels, and areas needing support, helping leaders make balanced decisions that enhance both productivity and employee happiness.

Burn Out Prediction Analysis

- This AI-driven feature monitors workload patterns and delivery trends to detect early signs of burnout. It identifies at-risk team members and promotes timely intervention, helping organizations build a culture of balance, growth, and sustained performance

Well-Being Integrated PM Tool

- Jaggle AI streamlines project management by automating administrative tasks while prioritizing team well-being, tracking workload, learning, and work patterns to boost both productivity and mental health.

 JAGGLE.AI

“

What cost us 20+ employee and 1 month can now be achieved within 2 hours by one employee

DIRECTOR GENERAL OF ACC

We're becoming the go-to for innovation

Our model is inherently sticky, adopted first by individual teams and naturally expanding across departments and regions within the same organization.

Early adopters are already requesting broader deployment, validating both our impact and scalability.

We are currently working with WOGS division in GovTech, to deploy Jaggle AI in whole of government system here in Bhutan

Jaggle AI – Project GNH Report (Q3 2025)

A Wellbeing-Centric Performance Overview

Project Overview

+ :: **Project Name:** ConvoAuth Platform

Team Size: 14 members

Duration Analyzed: July – September 2025 (Q3)

AI Summary:

Jaggie AI analyzed team sentiment, task data, sprint velocity, and communication logs to measure both **product performance** and **team happiness**.

"This quarter shows strong execution with signs of early fatigue. Productivity rose 8%, while Work-Life Balance declined 4%. Jaggle AI recommends scheduling a cooldown sprint and redistributing workloads."

Jaggle AI Project GNH Index

Overall Project GNH Score: 78 / 100 (↑ +3 from last quarter)

Domain	Description	Score	Change (QoQ)	Jaggie AI Insight
Psychological Wellbeing	Team morale, stress, sentiment	75	↓ 2	Slight dip in positivity in last sprint
Productivity & Execution	Task completion, sprint velocity	88	↑ 8	Improved sprint focus and clearer ownership
Collaboration & Communication	Meeting efficiency, team syncs	82	↑ 5	Better standups, fewer missed updates
Learning & Growth	Skill-building & feedback	72	=	Training frequency stable
Governance & Clarity	Ownership, transparency	86	↑ 6	More structured sprint planning
Work-Life Balance	Overtime, time off	67	↓ 4	Overtime increased near release phase
Innovation & Creativity	New ideas & experiments	71	↓ 2	Less experimentation due to tight deadlines
Community & Culture	Peer support, recognition	80	↑ 3	More peer kudos and bonding sessions
Sustainability (Retention)	Long-term engagement & burnout risk	76	↑ 1	Stable engagement but watch fatigue

Project Management, Reinvented!

Our team is loaded **with experts** in the field

Jigme Tashi Namgyal

FOUNDER & CEO

- 6+ years in software industry
- Good relationships with government
- Winner of National Student Entrepreneur of the year
- Global Student Entrepreneur Award Quarter Finalist

PAST CLIENTS

Coala Pay (USA), Selise (Bhutan/Switzerland), Oddiyana (South Korea), Pingpon (Japan)

Lhatul Wangmo

CHIEF PRODUCT OFFICER

- Deep experience optimizing complex software systems for streamlined workflows
- Expert in Project Management
- Certified Scrum Product Owner

PAST CLIENTS

Selise (Bhutan/Switzerland), Aoka (USA)

Tashi Tobgay Dakpa

CO-CTO

- AI & Machine Learning
- Full stack Engineer
- Mobile Application
- System Architecture

PAST CLIENTS

Selise (Bhutan/Switzerland), Azha Pasa (Bhutan), Bhutan Data Scientist (BHT), Jordhen deep mind (Bhutan)

Sangay Wangchuk

CO-CTO

- Deep experience in LLM and AI
- Over 7 years of experience working in tech field
- Mobile & Web App development
-

PAST CLIENTS

Selise (Bhutan/Switzerland), Oddiyana (South Korea), Move IT (Switzerland)

Jaggle.AI is a **dynamic** company with a team of experts involving specialized individuals in different domains, including but not limited to AI, web development, mobile app development, DevOps, and business development.

Dorji Tshering

FULL STACK ENGINEER

- Deep experience in full stack development
- 5+ years of experience in the field of IT
- Mobile App Development

PAST CLIENTS

Selise (Bhutan/Switzerland), Zhego (Bhutan)

Ugyen Jigme

MACHINE LEARNING ENGINEER

- Expert in ML and Data Science
- Fullstack Development experience
- Experience in Project PANOPTES

PAST & CURRENT CLIENTS

Royal Academy (Bhutan), NIIT University (India)
